THE AWARD WINNING MIXERGY CYLINDER

Making your home carbon-free doesn't have to be complicated.

Installing a Mixergy hot water cylinder can significantly reduce your carbon emissions and hot water bills today and throughout its lifetime.

Our patented top-down heating technology means you only heat the water you need for your home. You will save money and energy, no matter your chosen energy source: solar PV, a heat pump, or even upgrading your gas boiler.

The Mixergy cylinder is the perfect solution for reliable and fast hot water as you transition to a more sustainable home.

Heat what you need

Save money on your hot water bills and reduce your carbon emissions

Flexible heat source

Connect with a gas or oil boiler, electric heating, solar PV, solar thermal or heat pump

Heat quicker

Mixergy delivers hot water up to 10x faster than a conventional hot water tank

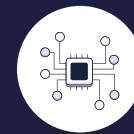

Smart control

Control your hot water via our app or gauge or use our automated machine learning

25-year warranty

Built to last and can connect to any energy source now or later in your retrofit journey

Usage and insights

Track your energy spend and hot water usage over the month

HEAT SMART WITH THE MIXERGY APP

The Mixergy app boasts cutting-edge machine-learning technology, putting you in complete control. You'll enjoy optimised hot water schedules, access to smart tariffs, and accurate information regarding your hot water usage.

Smart tariff integration

We'll automatically adjust your heating schedule according to the optimal times to heat.

Set schedules

You can use machine learning or manually set your own heating schedules, put your tank in holiday mode, boost and much more.

Gain insight

Track how much hot water you're using and monitor your usage.

APPROVED INSTALLER

Any G3 certified plumber or heating engineer can install a Mixergy tank for you, and it's just as easy to install as a conventional hot water tank.

You can use our Approved Installer Network, who receive additional training and support.

Give us a call to find an Approved Installer near you.

FLEXIBLE SOLUTIONS

Mixergy hot water cylinders come in a range of sizes and configurations so that they can be tailored to suit the needs of your home.

Because of our unique top-down heat technology, you can install a Mixergy cylinder up to a third smaller in size (compared to a conventional one).
