Heat what you need

HEAT SMART WITH MIXERGY

Making your home carbon-free doesn't have to be complicated. Installing a Mixergy hot water tank can significantly reduce your carbon emissions and hot water bills today and throughout its lifetime.

HEAT WHAT YOU NEED

Save money on your hot water bills and reduce your carbon emissions.

FLEXIBLE HEAT SOURCE

Connect with a gas or oil boiler, electric heating, solar PV, solar thermal or heat pump.

HEAT QUICKER

Mixergy delivers hot water up to 10x faster than a conventional hot water tank.

SMART CONTROL

Controls hot water via our app or gauge, with machine learning and smart tariff integration.
