The ecoSAVE is an 100% energy efficient oil filled electric Heater which incorporates the latest technology to allow 24/7 Wi-Fi controllability for both time and temperature

ecoSAVE® Dynamic Heater

The ecoSAVE Dynamic Heater is designed to meet the heating demands of the modern home. Unlike other inferior heaters on the market the ecoSAVE is manufactured from high grade aluminium designed to last. The Heating Elements and High Performance Heating Oil are housed within the sturdy high grade aluminium body of the Heater. Aluminium is regarded a superior material for transmitting heat.

Due to the modular construction and air flow outlets at the top of the Heater the ecoSAVE benefits from fast heat-up times and provides an even surface temperature with optimum convection through all heating cycles.

For ease of operation the easy-to-use digital programmable thermostat is located at the top of the Heater. It will accurately control both time and temperature, is fully programmable 24/7 and offers comfort, economy, frost protection and on/off settings.

Code	Output(watts)	Width(mm)	Height(mm)	Depth(mm)	Weight(kg)	Heats up to m2
